Mr. Richard A. McCoy:

What an pleasure to have received your letter, and to find that you will be visting the agricultural community soon. I do so hope you will be able to speak to my mother. Please ask for some identification so that you can be sure that it is she. I wrote letter after letter and she did not received any of them until I sent them special delivery. Please Sir , ask her what are her, and it must be her's alone intention about how long does she plan to stay, or if she plan's to ever come home. Let her know I am very much concerned as I love her very much. I am planning now to vist there soon as I get things in shape, which should be about May. I may add that my mother is eight eight or eighty nine year's young. This of course cause's me even greater concern. As you already have her name I need not send that information, but I stress that you speak to her alone, as she is with a group I donot understand. Mother writes and tell me she is in the promise land...May I once again thank you very much for your cooperation in a matter that is more than important to me. Please write at your first convience. May God's blessing be with you at all time's.

B6

Sincerely,

[redacted]
